

- What we need to do
 - UVU Colorscheme
 - By default
 - User can change colors
 - User set colors have to save
 - Color menu
 - Database or file to save colors
 - View whole memory in GUI
 - This may already work
 - Edit whole memory from GUI before running
 - Load a file from anywhere in memory
 - This may already work
 - I'll ask if our absolute path system works fine
 - Save whatever the user has in memory into a file
 - Maybe we copy the loaded file into a "working file" and then save the working file afterwards
 - Program will always run from the working file
- Actions
 - I'll divy out tasks
 - Jira
 - Fischer & Dani - Colorscheme
 - Alexis & Cole - New classes
 - Wednesday - Design Due Date
 - Design virtual machine into multiple classes
 - Memory class
 - Machine class
